

DEFINATION:

StudyBuddy is a full-stack web application that serves as an Ed-Tech tutoring platform. It enables verified tutors to create and publish courses and educational resources, while students can enroll, purchase content, interact with an AI assistant, and collaborate with peers.

StudyBuddy proposes a structured, three-role platform with the following key solutions:

• A tutor verification system requiring document submission and admin approval before a tutor can publish content.

• An automated AI-powered 6-step content moderation pipeline for all uploaded resources (PDF, images, YouTube videos).

• An AI-powered chatbot integrated into the platform with per-user daily usage limits.

• A group chat feature with shared message quotas, privacy controls, and admin-level oversight.

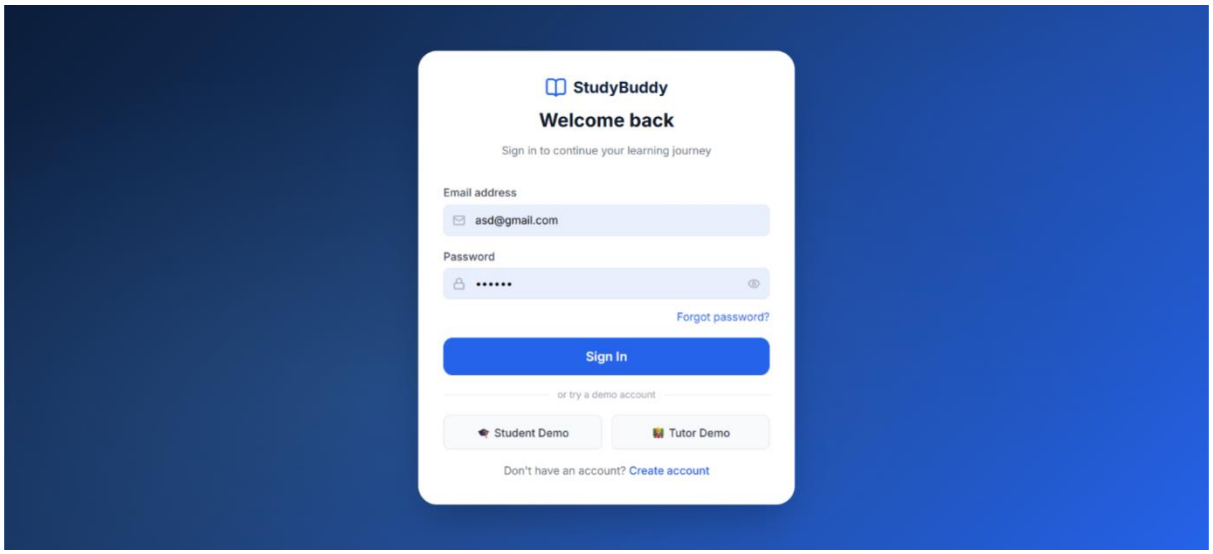

• A flexible payment system supporting three purchase types: full course, individual resource, and curated bundle.

- Pandya Jay (202500719010104)
- Chudasama Chandradeep (202500719010072)
- Rajyguru Chit (202500719010119)
- Hindocha Madhav (202500719001080)

MEMBER’S NAME:

- Pandya Jay : AI integration, Group Study Module,6-Step Moderation Pipelin
- ChudasamaChandradeep :Content Access Module,
- Rajyguru Chit:Admin Module,
- HindochaMadhav : AI chatboat
